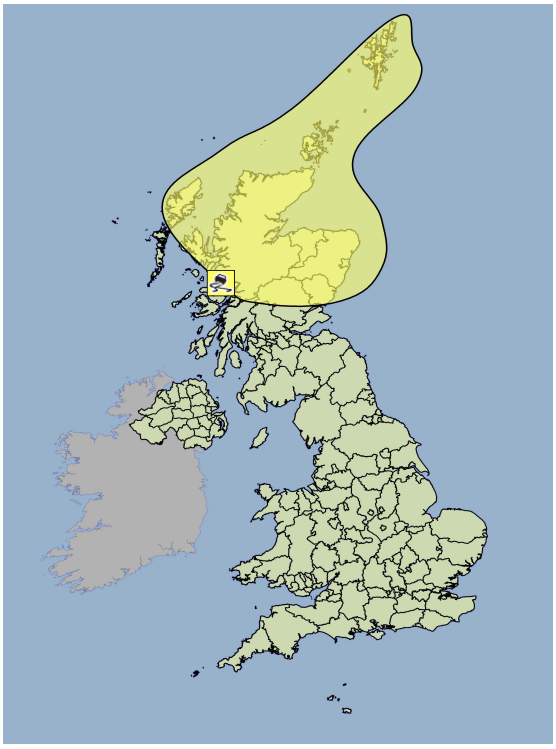
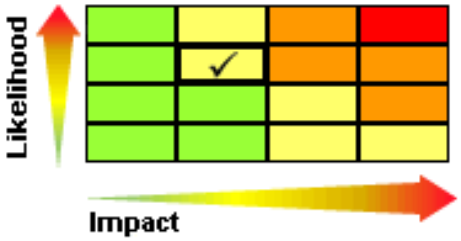
National Severe Weather Warning Service





Chief Forecasters Assessment
The slow-moving frontal zone across Northern Scotland will continue to give outbreaks of rain, sleet and hill snow today. It will weaken and start to move away southwards overnight. allowing clearer skies and quickly falling temperatures. A cold, showery airflow will continue to give outbreaks of rain, sleet, snow and hail to the Northern Isles and the far north of the mainland.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **20:00 on Sun, 07th Apr 2013** until **09:00 on Mon, 08th Apr 2013**

Some icy stretches are likely on roads across Northern Scotland on Sunday night and Monday morning following Sunday's rain and snow. In addition, snow showers across the Northern Isles and northern Caithness may lead to slight accumulations in places overnight.

The public should be aware of the potential for minor disruption to travel.
